## All About the Heart

critical  
organ  
nutrients

Your heart is a critical organ in your body. It is a muscle that is about the size of your fist. The heart pumps blood throughout your body. The blood gives your body the nutrients and oxygen it needs. Your heart never stops working. Eating healthy foods and exercising can keep your heart healthy.

**Underline two ways that you can keep your heart healthy.  
Write the main idea and an important detail from the text.**

**Main Idea**

**Detail**

## Pictures in the Sky

gazed

glee

spectacular

One spring day, Gail and Jen sat on the hill and gazed up at the clouds. "What do you see?" Gail asked. "I see a turtle in a car and a monkey on a train!" Jen said. They giggled. "Look over there! It's a goose wearing a crown!" Gail said. The girls smiled with glee. Seeing pictures in the clouds was a spectacular game!

**Underline the setting of the story.**

**Draw mental images of the pictures the girls saw in the sky.**

**a turtle  
in a car**

**a monkey  
on a  
train**

**a goose  
wearing  
a crown**
