

Dear BCS parents,

I have come up with a list of websites and activities for various grade levels in order to help the students keep up with their computer skills over our extended break from school. These are optional activities, as I realize you will be already given a lot of work for your kids in the core content areas, and possibly many other online activities or apps to work with already. I will really miss the students and look forward to seeing them again soon! Please feel free to contact me if you have any questions about any of the websites/activities that I have listed below or if you need any other assistance with your child's bcs google account, password, or online learning.

In His Grip,
Mrs. Boucher

Perhaps you've already heard about this, but my own kids are loving this:

[Live Lunch Doodles with Author/Illustrator Mo Willems](#)

K

- [Teach Your Monster to Read](#)
(Player log in is your child's first name)
- [Abcya.com](#)
(Lots of Reading, Math, and Strategy games)
- [Typetastic.com](#)
(Keyboarding games that focus on helping students learn where the keys are located on a keyboard)
- [Starfall.com](#)
(Lots of reading games and some math)
- [Spanish Practice](#) (songs that we sing in K Spanish class)

1st and 2nd

- [Abcya.com](#)
(Lots of Reading, Math, and Strategy games)
- [Typetastic.com](#)
(Keyboarding games that focus on helping students learn where the keys are located on a keyboard)
- <https://pbskids.org/games/>
(Games from PBS kids)
- Have your child type a story (even if it is just a few sentences) in Google Docs, Google Slides, or another word processing program

3rd and 4th

- [Typing.com](https://www.typing.com/)
(Click on student log in. For most students their username is their first initial and last name (students should know if theirs is different--but email me if you need help!) and their password is the same as their email password).
- Have your child type a story, journal, or letter in Google Docs, Google Slides, or another word processing program
- [Abcya.com](https://www.abcya.com/)
(Lots of Reading, Math, and Strategy games)

5th, 6th, 7th, and 8th

- [Typing.com](https://www.typing.com/)
(Click on student log in. For most students their username is their first initial and last name (students should know if theirs is different--but email me if you need help!) and their password is the same as their email password).
- [Coding](https://www.coding.com/)
- 7th and 8th graders: It would be great if you could finish the **Computer Problem Solving Assignment** in Google Classroom if you haven't finished it yet. That way, when we return to school we will be ready to create our project on it and still have time to create the yearbook too!
